OneCare - Project Description

Project Description	
Project Name:	OneCare
Team Name:	OneCare Innovators
Project Description:	OneCare is a comprehensive healthcare management application designed for both patients and doctors. It serves as a unified platform that facilitates seamless communication, appointment scheduling, and the organization of medical records, predict medicines based on symptoms using Deep learning Neural network (LSTM), medication reminders to stay on track with their treatment plans, while stress management tools, such as recorded meditation sessions, promote mental well-being. OneCare aims to simplify healthcare management and promote healthier lifestyles. Problem Statement For patients and doctors, who want a convenient and efficient way to manage healthcare, the OneCare app, is a unified healthcare platform, that facilitates communication, appointment scheduling, organize and manage the medical records, predict medicines based on symptom, medication reminder, managing stress & mental well-being through as recorded meditation sessions etc The app seeks to empower users to take control of their health and lead healthier, happier lives. Simplifying healthcare management for both patients and doctors
Benefit Outcomes:	● Efficient Communication: Enhance communication between patients and doctors, reducing the need for traditional methods. ● Streamlined Appointment Scheduling: Simplify the process of scheduling appointments, making it more convenient for both parties. ● Organized Medical Records: Provide a centralized platform for managing and accessing medical records, ensuring accuracy and efficiency. ● Medication Management: Assist users in adhering to their medication schedules through timely reminders. ● Stress Management: Offer stress relief and mental well-being support through recorded meditation sessions. ● Empowerment: Enable users to actively participate in their healthcare journey, leading to a healthier and happier life. With its focus on improving healthcare management, OneCare strives to transform the healthcare experience, fostering a more connected and empowered community of patients and healthcare providers.
